PROVEN PERFORMANCE

Inspired innovation. Practical experience. Quality service. Technical expertise.

Recent Project Examples

Customer & Project Description Task	Task Examples
<p>Centers for Disease Control and Prevention: VIEWS II ASD designed, built, and implemented the VIEWS II system which allows for the electronic validation of cause-of-death information in real time. This system improved data quality and timeliness, enabling CDC to better monitor health trends and to focus their prevention and education efforts.</p>	<ul style="list-style-type: none"> • Project Management • Requirements Analysis • Software Development • Federal/State Collaboration
<p>Centers for Disease Control and Prevention: Specimen Locator ASD designed, developed and implemented an Intranet-accessible, center-wide solution to help CDC realize the full value of the millions of unique specimens preserved at their centralized facility. ASD's solution enables CDC scientists to identify, locate, and retrieve data specimens for translational research.</p>	<ul style="list-style-type: none"> • Project Management • Requirements Analysis • Software Development
<p>Centers for Disease Control and Prevention: SharePoint and iSupport IT Services ASD provides project management and technical support of SharePoint site data collections, iSupport helpdesk call centers, server administration, change management, and governance. Our work enables a shared enterprise-wide framework and the collection and use of metrics that aid in business activity analysis.</p>	<ul style="list-style-type: none"> • Project Management • Operations and Maintenance • Enhancement Support • Technical Support
<p>Department of Veterans Affairs: VetsNet ASD services at VA have included architectural and software development support for the maintenance and development of VetsNet, a custom suite of applications which process over \$4B in payments each month to more than 4 million Veterans.</p>	<ul style="list-style-type: none"> • Service Oriented Architecture • Software Development • Enhancement Support • Deployment Support
<p>Department of Veterans Affairs: MAP II ASD develops and enhances mobile apps which allow Veterans and health providers to gather information and to monitor and track health and medical data in order to enhance and improve patient screening, assessment, and care.</p>	<ul style="list-style-type: none"> • Mobile App Development • Mobile App Enhancements • Database Administration • Testing
<p>Department of Veterans Affairs: Virtual Lifetime Electronic Record ASD assists with research related to healthcare information exchange.</p>	<ul style="list-style-type: none"> • Research Analysis • Statistical Research
